Dear Parents/Carers

### **Re: Asthma Inhalers**

We would like to take this opportunity to remind parents of our procedures regarding the administering of Asthma Inhalers in school.

It is the schools policy to only administer the dosage written on the prescription box of your child's inhaler. Should your child require a higher dosage than recommended, we will require written permission from your GP.

We are regularly being asked to give higher doses than prescribed, and feel that if this is the case your child's medication needs reviewing. We do not give the preventative inhaler during school hours, but children can have a reliever inhaler kept in school, clearly labelled in the original box.

We thank you for your cooperation in this matter.

Miss N King  
First Aid Officer
